JCB DieselMax Genset Engines

With the highly successful introduction of the JCB DieselMax engine range in 2005, JCB have pushed design boundaries further with the new JCB DieselMax genset engine range. Developed specifically for the power generation market, the new range of engines feature:-

- 50, 60, 80 & 110kVA ratings available (@1500rpm, 50Hz, Prime Power)
- EC Stage 2 emissions compliant
- Mechanical fuel injection
- Low noise : 89dBA @ 1 metre
- Naturally aspirated, turbocharged and turbocharged after-cooled specifications
- Single sided servicing
- SAE 3 flywheel housing, 11.5" flywheel
- 12 volt starter motor & alternator
- HWT & LOP switches
- Front pedestal type mounting feet
- Radiator c/w fan guards
- Bel driven "pusher" fan
- Twin element air cleaner c/w restriction indicator
- A wide range of optional extras available

Full engine specifications and pricing are available from Turner Powersystems upon request.
