TURNER POWERSYSTEMS INTRODUCES FLAME PROTECTED JCB ENGINE

Turner Powersystems are pleased to announce the introduction of our flame protected JCB diesel engine. Developed primarily for the oil and gas industry, the package is based around the highly successful JCB DieselMax NA engine and complies to all European ATEX Directive Zone II requirements.

Flame proof equipment includes:-

- Automatic hydro mechanical fault shut-off system
- Air inlet shut-off valve
- Inlet flame trap flange mounted to special inlet manifold
- Fuel shut-off valve for overspeed
- Manual fault reset and start bypass
- Emergency stop lever
- Throttle control cable and fuel pump mechanical stop
- Integral jacket water-cooled exhaust gas manicooler

The package has been developed in conjunction with our sister company—FlameTec Ltd (www.flametec.co.uk).
